CUSTOMIZED ASSEMBLY MACHINES

TECNOIDEAL designs and builds innovative high speed automated assembly system that deliver repeatability, fast cycle time and unmatched reliability for applications across a wide range of industries. Creative design team manage your project from concept to finished product.

TECNOIDEAL core technology is based on:

- cutting and coiling of tube
- assembly of components
- solvent applying
- tape banding
- leak and obstruction test
- check of components insertion by means of vision system interfaced with PLC of the machine.

Average productivity can vary from a minimum of 1200 pcs/h (for complete sets) up to 5.000 pcs/h for simple subassemblies

Some examples of finished product

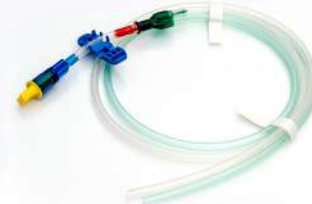

Heparin Line

Service Line

Patient Line

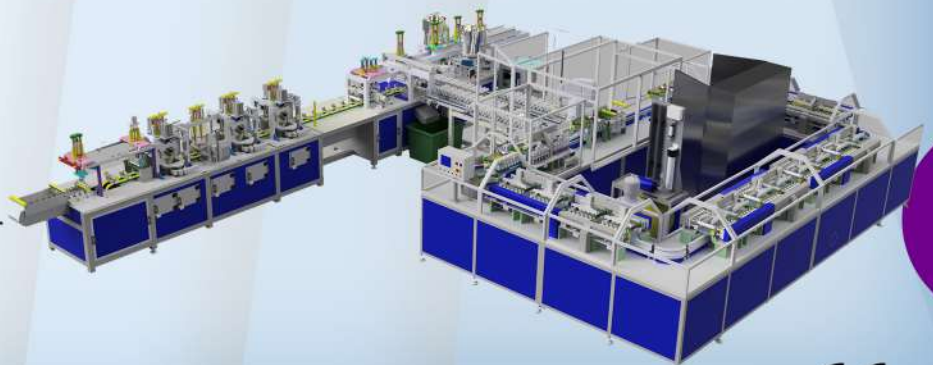

Dialyzer Line

Infusion Chamber

TECNOIDEAL has a wide experience in manufacturing of complete lines for dialyzers assembly (with all types of membranes), including wetting/testing and drying of Polysulfone filter.
